Additional EL Exit Criteria Decision Tree

Does the student have an ACCESS overall composite score of at least 4.5 and ALL domain scores are at least 3.5?

Yes → Exit the student from the LIEP and reclassify the student in MARSS.

No →

Does the student have an ACCESS overall composite score of at least 4.5 and 3 out of 4 domain scores are at least 3.5?

No → Do not exit the student and continue instruction in an LIEP.

Yes →

Is there documented evidence that the student is not yet successful in core content classes because of a need for additional language support? And Is there documented evidence that the student needs continued language support in the domain that is below 3.5? And If the student has a disability, does a consultation with the student’s IEP team find that continued EL service would benefit the student?

If yes → Consult with the student’s parents to recommend continuing instruction in an LIEP. Document evidence in the student’s cumulative folder.

If no → Exit and reclassify the student from the LIEP.

*If schools and districts are unable to or fail to document a continuing need for language support, they may not retain a student in an LIEP.
