School Closure Guidance for Public School Districts and Charter Schools

Version: March 27, 2020

*This document was intended to provide guidance for public school districts and charter schools during the March 18-27 distance learning planning period. Much of this information on specific programs and guidance related to serving various groups of students will continue to be useful to school districts and charter schools.

Vision

Minnesota is the best state in the country for children to grow up in – those of all races, ethnicities, religions, economic statuses, gender identities, sexual orientations, (dis)abilities, and zip codes.

Guiding Principles

- Practice servant leadership
- Treat everyone with respect and dignity
- Do the right thing, especially when it is difficult
- Ask how your actions are reinforcing or removing structural inequity
- Promote the common good over narrow special interests
- Be accessible, transparent, and accountable
- Include voices from communities who will be most impacted

Priorities

Minnesota does best when state agencies and community partners collaborate to achieve common goals. We will solve problems in education, health care, environment and energy, housing, jobs, transportation, and so much more by focusing on these key priorities:

- Children and Families
- Equity and Inclusion
- Thriving Communities
- Fiscal Accountability and Measurable Results
- Minnesota’s Environment

Purpose

Ensure that every student in the state of Minnesota receives an equitable education and has equal access to learning and instruction during the COVID-19 pandemic.

Overview

Minnesota school districts and charters are preparing instructional plans that will allow meaningful, relevant learning to take place while schools are closed. Schools are expected to develop lessons utilizing a distance learning model for every level in grades public PreK-8 and each graduation requirement course for grades 9-12.

We do expect that ALL Minnesota students continue to receive an education. The Minnesota Department of Education (MDE) and the State of Minnesota are committed to continuing to provide stable funding and reliable support and technical assistance to schools.

This document is to be used by districts and charter schools in preparation for distance learning. Districts should use the Governor’s Executive Order 20-02 in all planning and preparations.
During the March 18 to March 27 planning period outlined in the Governor’s Executive Order as well as during any time when all staff are expected to report to work, it is important to follow all MDH COVID-19 guidelines. This includes not asking staff to report to work based on higher risk status or other conditions.

**Distance Learning**

Distance Learning defined: Students engaging in distance learning have access to appropriate educational materials and receive daily interaction with their licensed teacher(s).

It is important to note that distance learning does not always mean e-learning or online learning. It is critical to provide this learning in a format that can be equitably accessed by all students.

**Minnesota Department of Education Guidance on Distance Learning**

MDE expects that students who participate in distance learning have full access to appropriate educational materials. We’ve developed resources for distance learning planning in various academic content areas.

Districts and charters must maintain educational continuity for schools and programs. As a district or charter, you must ensure equity in your plans. School districts and charters must ensure equal access to ALL students.

As your district or charter prepares to implement a distance learning model, the Federal and State requirements must be followed. This means that students need to be able to participate in their learning equitably and have access to all relevant services and supports. Considerations include, but are not limited to:

- Ensuring all students in the school or district will have equal access to the learning and required materials, including technology.
- If using an online learning system, ensure it can effectively support the district’s unique learning and teaching needs, including the ability to provide differentiated instruction as well as one-on-one support for students who need it. Regardless of where the learning is happening, supports identified on a student’s Individualized Education Program (IEP) or 504 Plan must be provided (more detail below). Individual Learning Plans for English Language Learners must also be followed.
- Consider student privacy when developing your distance learning plan. See the U.S. Department of Education’s Protecting Student Privacy page, and their list of related resources.
- Providing training to staff, students, and parents/guardians on implementation of your distance learning model and the district’s expectations.
- Programming options for school nurses, school counselors, school psychologists, school social workers, paraprofessionals, other school specialists and cultural liaisons.
- Tracking the attendance of both students and staff.
- Ensuring the distance learning model in use is secure and will not allow for the release of protected student or staff information.

Schools should provide materials for students to continue their learning. Each school would determine the most appropriate way to communicate and provide instruction for each student which could include some/all of the following:
• Paper packets or worksheets, which could be distributed daily by bus route or collected several times a week at a central location
• Textbooks
• Telephone instruction
• Online resources (take into account availability of broadband)
• Instruction via the school’s learning management system (LMS)

Care for Children of Critical Workers

The previous information in this section for the school closure period has been removed to ensure clarity and consistency in information related to the care for children of emergency workers. If you would like information related to this topic specifically for the School Closure period ending on March 27, please email MDE. For information regarding care for critical workers beginning on March 30, please refer to this guidance.

Nutrition

Districts must ensure meals are available to all students who need them in the way that works best for your community, such as grab-and-go or delivery or communicating directly to students and families the location of open sites.

Q-and-A on continuing school meals:

• How do we continue to feed children?
  o Schools will have two options to serve meals when schools are closed:
    i. Schools can apply for a waiver to MDE to serve student meals under Seamless Summer Option (SSO)
    ii. Schools can apply for a waiver to MDE to serve student meals under Summer Food Service Program (SFSP)
  o How do SFSP/SSO site eligibility requirements apply to COVID-19 meal service? Must all schools served be in low-income areas?
    o For dismissed schools with 50 percent or more of their enrolled students certified eligible for free or reduced price meals, SFAs may develop meal distribution methods in which meals are available to all families with children enrolled in that school, with a focus on serving low income children. These schools are considered open sites.
    o For dismissed schools with less than 50 percent free or reduced price enrollment, meal distribution methods must more directly target the households of enrolled children who are eligible for free or reduced price meals. These schools are considered closed sites.
  o How do we apply for the waivers?
    o Districts and charter schools will apply through the designated Survey Gizmo that will be distributed to school nutrition directors from MDE. The application will include how you will unitize meals, delivery, how to count, and how to serve low-income children.
    o Once approved for the waiver, the second step is for the school to submit an application through CLiCS. MDE application staff will then review and approve the CLiCS application.
• What information do I need to provide to MDE for the waiver?
  o Which sites will be closed
  o Start date and time period you are seeking to serve
  o Method of distribution
  o Meals offered
  o Plan for communicating changes with parents and households
  o Method of counting and claiming meals

• Do we need to follow the meal pattern? What is the meal pattern?
  o Yes, meal pattern must be met and the specific meal pattern will correspond with the program option you choose. Please watch additional technical assistance from MDE.

• What is the meal service for SSO and SFSP?
  o Meals must be distributed unitized. For example:
    ▪ Food trucks/bus
    ▪ Bagged lunch
    ▪ Delivered to homes
    ▪ Grab-and-Go/Pick-up
  o Food must be kept according to proper food handling procedures. For example, if handing out food in a parking lot, must keep milk cold, food hot (if applicable), and use disposable paper/plastic products. Consult updated USDA and MDH guidance on extra measures particular to COVID-19.

• How do I train my staff?
  o MDE will be creating a webinar for schools and school nutrition staff
  o Establish a plan for phone and email triage
  o Review written waiver and guidance materials

• How long do I have to get my application in?
  o The waiver and application is a two-step process:
    i. **Waiver: An online request is required** to demonstrate the intent to request the waiver to operate the SFSP/SSO in a non-congregate setting. Once a completed request is submitted, MDE staff will review and approve waiver requests and will communicate with the school through email.
    ii. Application: The second step is the application update or submission in the CLiCS. This application allows for claims and reimbursement to be submitted under this waiver.

• Can At-Risk Afterschool meal programs shift to SFSP if under a SFSP sponsor?
  o At-Risk does not need to shift to SFSP. It can still operate an afterschool meals program.

• How many meals can be provided with SFSP?
  o SFSP sites may offer up to two meals/snacks per site per day (lunch and supper may NOT be served on the same day at a site).

• Can a nonprofit sponsor of At-Risk at a school site still provide meals?
  o The At-Risk program can still operate if a school is closed but still in session (distance learning). However, USDA is not offering a non-congregate waiver for At-Risk sites. If a school site has been ordered to close, it may not be available for At-Risk service.
MDE received additional waivers from USDA to bring more flexibilities to all child nutrition programs. This includes a waiver which allows schools and sponsors to:

- Operate the Summer Food Service Program during unanticipated school closures related to COVID-19 at school sites and in a non-congregate setting.
- Provide non-congregate dinning for all child nutrition programs
- Change meal service times and allow meals to be bundled for multiple day delivery/distribution
- Waive the education enrichment component to the CACFP At-Risk program
- Adjust meal components if certain foods are not available
- Combine SFSP and CACFP At Risk meal service to provide three meals and snacks to programs providing 12 hour care
- Distribute meals for student or child directly to the parent/guardian

See the Food and Nutrition COVID-19 Resources page for more information.

Implementation Guidance

- Ensure all the students’ nutritional needs are addressed. This includes students with allergies and other food restrictions. Make sure to mark the food appropriately.
- Create multiple geographically located food distribution centers where necessary. Students are not allowed to eat inside the school. An exception to this can be made for schools providing care for children of families of emergency workers. Schools caring for those children must provide meals in a manner that adheres to the Minnesota Department of Health’s social distancing guidelines.
- Ensure that all necessary personnel are stationed to maximize student and staff safety and that all distribution sites are supervised.
- Explore distribution strategies that will avoid large gatherings of people and make social distancing possible.
- SFSP sites may offer up to two meals/snacks per site per day (lunch and supper may NOT be served on the same day at a site). Both meals can be distributed at once either via pick-up, drive-up or delivery.
- Children do not need to be accompanied by an adult to receive food. We are awaiting guidance from USDA on whether parents/guardians can pick up food for their children and whether or not children can pick up food for their siblings.
- Allow ample and reasonable amount of time for meal pick-up for each meal service, recognizing that families may be experiencing challenges during this time.
- Use multiple modes of communication to inform students and families of available food service, including time, location, and method of distribution.
- Consider multiple methods of distribution, such as drive up; walk up; satellite locations, such as libraries, churches, park districts, and youth centers; home delivery via bus routes; and other options.
Meals and/or Instructional Material Pick-up

Implementation Options for Consideration

- **Drive-up (for meals):** School personnel will communicate with families the time frame in which food (breakfast/lunch) will be distributed. Families will drive to their home school or alternative location, provide their name and a sacked breakfast and lunch will be given. Each family will be provided with one meal per eligible child. Both breakfast and lunch can be given to family at once. If the home school is located on a busy intersection, another location of the school can be used.

- **Walk up (to school building):** Children and adults will walk to the school or alternative location to pick-up food and/or materials

- **Satellite locations (if opened):** Any place that families have access to. School personnel should communicate with community facilities to determine if their location is open and available to serve as a food distribution center. Locations other than schools, i.e., any place that families have access to. Community facilities could include:
  - Libraries
  - Places of worship
  - Park districts
  - Youth/community centers

- **Home delivery:** School staff member or designee will deliver meal(s) and/or materials to student homes. Families who lack transportation or with medically fragile children can request that food be delivered to their residence. Schools should initiate plans with families to make arrangements prior to delivery. For meals, both breakfast and lunch can be delivered at once.

Handling School Materials

There have been many questions about the viability of COVID on surfaces. A recent study found that the COVID-19 coronavirus can survive up to four hours on copper, up to 24 hours on cardboard, and up to two to three days on plastic and stainless steel. It is important to remember that those lab results are based on ideal conditions. There are many variables that effect the ability of the virus to survive and then transmit, including temperature, humidity, amount of virus present and many other factors.

School districts may wish to consider methods where staff pick up papers on Mondays, to ensure they have been in the building for at least 24 hours, without contact. They may also wish to allow a 24 hour between when staff return paperwork prior to family pick up. This is not necessary, however.

- **Remind families:**
  - To wash their hands before handling and delivering homework
  - To delay turning in homework if someone in their home is experiencing a fever or cough

- **When working with student papers, staff should:**
  - Wash their hands before and after working with papers from student homes
  - Avoid touching their faces while working with papers
  - Avoid working with papers that will be returned to students if they have a cough, shortness of breath or fever
• Clean up papers and their work spaces when done
• Avoid working with papers on family eating spaces

It is important to remember that this not a likely way that COVID-19 is spread, the risk is very low and personal responsibility for hand hygiene and environmental cleaning exert the most control over limiting ways to contract COVID-19.

Health and Wellness

Please consider the health and wellness of your students. How will you ensure the short and long term health and wellness of your:

• Students
• Staff
• Families
• Community
• Volunteers
• Contractors

Talking to Children about COVID-19

Concern over this new virus can make children and families anxious. It is very important to remember that children look to adults for guidance on how to react to stressful events. If adults seem overly worried, children’s anxiety may rise. Adults should reassure children that health and school officials are working hard to ensure that people throughout the country stay healthy. Children also need factual, age appropriate information about the potential seriousness of disease risk, so the focus of conversation should be concrete instructions about how to avoid infections and the spread of disease. Teaching children positive measures, talking with them about their fears, and giving them a sense of some control over their risk of infections can help reduce anxiety.

Additional information and specific guidelines can be found at: Talking to Children about COVID-19

Mental Health and Well-being

The stress of COVID-19 and school closure can increase the worry and anxiety of students, staff, families, and communities. The following resources and tips can be used by school and district leaders to protect your health and well-being and of those you serve. Districts and charter schools include plans for smooth continuity of services including school-linked mental health and other student supports.

Bullying and Harassment

COVID-19 is not at all connected to race, ethnicity, or nationality. School staff should be mindful that bullying, intimidation, or harassment of students based on actual or perceived race, color, national origin, or disability (including the actual disability of being infected with COVID-19 or perception of being infected) may result in a violation of state and federal civil rights laws. Pursuant to their safe and supportive schools plan, school districts
and charter schools must take immediate and appropriate action to investigate what occurred when responding to reports of bullying or harassment. If parents and families believe their child has experienced bullying, harassment, or intimidation related to the COVID-19 outbreak, they should contact their school principal or their designee, per the safe and supportive school plan.

**Social and Emotional Learning**

The Collaborative for Academic, Social, and Emotional Learning (CASEL) - [https://casel.org/covid-resources/](https://casel.org/covid-resources/)

**Mental Health Support Resources**

The impact of a school closure often goes beyond academics. Schools need be aware of and prepared to cope with the potential impact these closures will have on the mental health and wellbeing of students, staff, and families. The following resources can help schools and districts provide supports during school closure.

Minnesota Department of Human Services provides the most up-to-date information for providers, counties, tribes and members of the public - [https://mn.gov/dhs/covid-19/](https://mn.gov/dhs/covid-19/)

National Alliance on Mental Illness Minnesota - [https://namimn.org/support/mental-health-support-and-information-on-covid-19/](https://namimn.org/support/mental-health-support-and-information-on-covid-19/)

The Colorín Colorado Coronavirus: Multilingual Resources for School - [https://www.colorincolorado.org/coronavirus](https://www.colorincolorado.org/coronavirus)

The Child Mind Institute's Talking to Kids About the Coronavirus. Students may experience hunger, abuse, or lack of healthcare in their homes and with their families. Know local resources and be prepared to help - [https://childmind.org/article/talking-to-kids-about-the-coronavirus/](https://childmind.org/article/talking-to-kids-about-the-coronavirus/)
Attendance

Ensure your attendance and absence policy accommodates for the implementation of your distance learning model. Clearly communicate expectations to students, staff and parents. All students should follow individual district, school, or charter school policies and guidelines for excused absences. Please exercise caution before starting the truancy process. Please coordinate with your county on any decision.

Homeschool Options for Parents

Minnesota’s Compulsory Instruction Law requires all students ages 7-17 to receive instruction. Families may choose to withdraw their children from public school and provide instruction in a homeschool setting. Families who plan to home-school their children are required to register with the school district in which they reside. If a student is open enrolled or attending a charter school, the family must register the student with the school district in which the family resides, not the school from which the student unenrolled.

A sample registration form is available from the MDE website. A Homeschool Questions and Answers document is also available; it provides additional information about home schooling in Minnesota.

MDE’s Ombudsperson is available to answer questions about home schooling from families, districts, or charter schools. Please contact Cindy S. Jackson at 651-582-8572 or mde.school-choice@state.mn.us

Special Education Services – IEP or 504 Plan

This section ensures that students with disabilities will continue to receive specialized instruction and related services through a distance learning model to meet their identified needs.

This section provides guidance for districts to develop a distance learning model that includes equitable access to specialized instruction and related services for students with disabilities so that they have access to general education standards and continue to demonstrate progress toward the general education standards and IEP goals.
This section has resources including written guidance from the U.S. Department of Education, Office of Special Education Programs and the U.S. Department of Education, Office for Civil Rights.

Provision of education for students (birth – 21) with disabilities is another important consideration when engaging in this planning.

In the event of extended school closures, the school district remains responsible for the free appropriate public education (FAPE) of its students eligible for special education services who have an individualized education program (IEP) or 504 plan. Districts and charters must plan how they will continue to meet the requirements of Part B (3- 21) and Part C (birth to three) of the Individuals with Disabilities Education Act (IDEA), Part B and Part C, and Section 504 of the Rehabilitation Act of 1973. Please consider the following:

- Develop a process to communicate with parents and guardians regarding their child’s services, which should include discussion regarding amending IEP’s to address how best to meet the student’s needs in a flexible learning model. This includes direct specialized instruction, related services, and accommodations.
  - Consider what other IEP team members, and agencies and organizations should be included in the communication, including contracted providers and non-public agencies. Tele-related services can be used to address needs such as speech and language, and mental health services.
  - Review the delivery of special education and related services, as well as general education curriculum to ensure that students with disabilities have equal access to distance learning. This includes children from birth through age 21. This will necessitate communication between the case manager, the general education teachers, the parent/guardian and related services providers to ensure that students with disabilities can be appropriately involved and make progress toward the general education standards and IEP goals.
  - Districts will need to address translation and interpreter needs for students and families when developing and providing instructional materials.
  - Consider the use of hot spots and free internet services being offered by internet companies for the delivery of instruction and for due process procedures.
  - Consider delivering instructional materials to students through the school bus transportation routes.
- Develop a protocol to communicate with school administrators and educators in order to prepare staff to plan for the needs of students eligible for special education, child find activities, evaluations/reevaluations, and IEP implementation.
  - IEP’s must continue to be implemented.
  - Address the process you will use to hold IEP meetings to review IEP goals and services, and the process to conduct evaluations and reevaluations. This could include virtual meetings and phone conferences.

Review the memo from the US Department of Education, Office of Special Education Programs with questions and answers to federal special education issues related to school closure, district closure and services and programming for medically fragile children on IEPs and educational opportunities, such as distance learning.
Review the [webinar](#) from the Office for Civil Rights (OCR) at the U.S. Department of Education on ensuring web accessibility for students with disabilities for schools utilizing online learning during the Coronavirus (COVID-19) outbreak.

For relevant guidance regarding how schools can protect civil rights during an outbreak, see the [U.S. DoE Office for Civil Rights Fact Sheet: Addressing the Risk of COVID-19 in Schools While Protecting the Civil Rights of Students](#)

**Q & A on Special Education Services**

- **When schools move to a distance learning model for all students as the result of a state-ordered school closure, how should schools provide special education services? Will there be compensatory time?**
  - See OSEP’s Q and A document above, question A1.
- **What does direct instruction mean in the use of a distance learning model during the COVID-19 emergency?**
  - Instruction may be provided by special education staff, including related service providers. Districts will need to address translation and interpreting needs for students and families when developing and providing instructional materials.
  - This can occur through a variety of means consistent with the distance learning section of this document. This includes:
    - Paper packets or worksheets, which could be distributed daily by bus route or collected several times a week at a central location
    - Textbooks
    - Telephone instruction
    - Online resources (take into account availability of broadband)
    - Instruction via the school’s learning management system (LMS)
  - This can also include platforms such as Skype, face time, and Zoom.
  - Districts will need to address translation needs for students and families when developing and providing instructional materials.
- **How do we implement a distance learning model during COVID-19 school closures for students who have IEPs with transition related activities in the community?**
  - As part of the planning process, IEPs with transition related activities in the community will need to be amended to reflect the distance learning model. See also the OSEP Guidance
- **How does this impact the district’s responsibility for special education monitoring activities and associated timelines?**
  - If your district has a scheduled program monitoring visit during the district closure, MDE staff will contact you to determine how to complete monitoring activities.
- **How does this impact any pending special education dispute resolution mediations, facilitated IEP meetings, complaints and due process hearings in my district?**
  - During your planning for school district closure, please send emails to Karen Reiter at Karen.reiter@state.mn.us in the MDE Division of Compliance and Assistance to discuss options.
- **Can a school staff member ask if the parent has recently traveled out of the country prior to providing services in the student’s home?**
o See the Office of Special Education memo, question B2. This is a question best addressed by the local school district in consultation with the Minnesota Department of Health and their guidelines.

- What is the district’s obligation for due process meetings (annual reviews, initial IEP, reevaluations)?
  o IEP teams are allowed to meet virtually to complete due process activities. Districts and charters could also move forward with assessments and evaluation available online. For activities that are not reasonable to carry out if a school is closed or a student is ill, those activities could be delayed until the district is reopened.

- Will there be any special education funding impacts?
  o All requests for reimbursement will be evaluated on a case-by-case basis. But generally, special education and related services provided under an IEP through distance learning should be reimbursable. For further questions regarding state and federal streams of funding, contact mde.sped@state.mn.us.

For questions related to special education compliance, please contact Marikay Canaga Litzau at Marikay.litzau@state.mn.us

For all other special education questions for students with disabilities ages three through 21 please contact Robyn Widley at robyn.widley@state.mn.us.

For Part C information, please see the early learning/Part C section of this document. Please contact Lisa Backer for Part C questions at lisa.backer@state.mn.us.

Additional resources from the US Department of Education:

OSEP resources: COVID-19 information and resources page

English Learners

Provision of education for English learners is an important consideration when engaging in this planning. The school district remains responsible for educating English learners. Districts and charters must plan how they will continue to meet the requirements of English learners’ educational needs.

By law, students who are identified to receive English language development services must be provided supports that allow them access academic content. English learners must receive research based, appropriately resourced supports to access content, and districts may not withhold services based on characteristics such as immigration status. A brief overview of legal requirements for English language development services can be found in the U.S. Department of Education’s Dear Colleague Letter regarding education for English learners. Immediate considerations for English learners include:

- Access to a reliable internet connection
- Communication with families that may not speak English as a primary language
- Ability of the student to understand and produce complex academic language for assignments without typical scaffolds
• Availability of scaffolding methods that are available in a distance learning environment

Ultimately, English learners need to have the chance to access grade level standards and still need some sort of support to access academic content.

Considerations for Supporting English Learners

• Do we still need to serve English learners?
  o Yes. While distance learning is likely a new medium of instruction for many students and educators, the law is clear that students still need to be served. To the extent possible, that service should reflect the language proficiency levels of the students. In some cases, different service levels would boil down to the amount of time that students receive services from a licensed English language development teacher. We are aware that many English language development teachers serve students by co-teaching content classes with licensed content teachers. Collaboration between English language development teachers and academic content teachers is still encouraged. Regarding content instruction, English learners still need to have access to core content instruction from a teacher licensed in that content area, however that looks in your distance learning setting.

• What types of scaffolds can we provide to English learners?
  o Educators should consider the options that may be available to them to provide access to content for English learners. Home language is an asset and should be utilized. Many online learning resources, such as Khan Academy, provide videos in Spanish, French, and Portuguese. While these translations certainly wouldn’t help many English learners in Minnesota, and it certainly wouldn’t substitute for core content instruction, it is the type of resource that educators should consider using. We urge caution when using it because it certainly doesn’t always provide accurate translations, but Google Translate is a resource that should be considered to aid students. However, we emphasize that this is a tool and is not a substitute for English language development services and shouldn’t be used absent from other attempts to scaffold instruction. Teachers should also consider using online platforms such as Google Hangouts and Zoom—which has been made free for educators during this pandemic—to provide small group instruction to students provided that students have access to devices and a reliable internet connection.

• What if students are not able to finish ACCESS testing?
  o This issue is addressed in the assessment section of this document.

• How should we reach out to the parents of students receiving English language development services and multilingual parents in general during the COVID-19 pandemic?
  o Districts will need to consider a variety of ways to reach out to families that do not use English as a primary language. Multilingual staff have not only linguistic resources but also cultural capital that may allow them to be trusted messengers. They should be leveraged whenever possible. Districts should also consider multiple modes of communicating, such as by phone call, email, and social media in as many languages as they are able. Community assets should also be leveraged. Multilingual and multicultural leaders of community organizations and religious institutions that the community trusts should be tapped whenever possible to reach out to families that primarily speak a language other than English.

• Can the English language development teacher provide credit-bearing content instruction via distance learning if they don’t have a license in the content area or if they are not collaborating with a licensed co-teacher?
No. This is the case during typical school instruction and this requirement does not go away in this situation.

- Do we have to screen and identify students for English language development services during the distance learning period?
  - The law is clear that students who enroll in your district or charter school, even during this period, need to be screened for services. The Minnesota Department of Education is drafting guidance for how districts and charter schools should approach this during the distance learning period.

**Students Experiencing Homelessness or Housing Instability**

Minnesota public and charter schools identified over 9,000 students experiencing homelessness enrolled on October 1, 2019, attending over 1,400 schools spanning 77 counties. Roughly double this number are expected to have been identified by the end of the school year. Due to the economic impacts of the COVID-19 pandemic, the number of students facing homelessness could grow even further, particularly among families who today may be in a precarious housing situation, such as paying too much for rent and dependent on low-wage jobs that may also be impacted by the pandemic.

Students experiencing homelessness face unique barriers from school closings and to participating in distance learning, including limited availability of technology and living situations that do not support doing homework (e.g., in a car). Schools have critical responsibilities for the education of these students, and are also critical partners in the community-wide response to addressing the unique vulnerabilities of these students. Students experiencing homelessness are disproportionately students of color, lesbian, gay, bisexual, transgender, or queer (LGBTQ), and/or students with disabilities, meaning that a robust plan for meeting the needs of these students is also a critical equity issue to ensure that all Minnesota students can participate fully in distance learning.

Every school and school district’s distance learning plan should specify how it will satisfy the Federal requirements of the *McKinney-Vento Homeless Education Assistance Improvements Act of 2001*, as amended by the Every Student Succeeds Act of 2015, to support homelessness students throughout this crisis and promote their full participation in their education throughout the duration of the distance learning period.

During the planning period, schools and school districts should:

- Understand the [legal requirements for districts](#) to support homeless students in having full access to education, which remain in full force and effect. In addition to MDE’s [posted guidance for school districts on meeting these requirements](#), several technical assistance centers and associations also have guides for implementing these requirements, including the [National Center on Homeless Education](#), the [National Association for the Education of Homeless Children and Youth](#), and [SchoolHouse Connection](#).

- Designate key staff who will coordinate homeless-specific responses at a district or charter school level. In addition to the Federally-mandated district-level homeless liaison role, schools with a high rate or large number of homeless students will benefit from having designated staff at a school-level for assessing, planning for, and responding to the needs of homeless students.
Monitor evolving and emerging recommendations specifically pertaining to homeless students during the COVID-19 pandemic offered by the National Center on Homeless Education, and SchoolHouse Connection and other recommendations that may be available from other sources over time.

Follow social media accounts of and subscribe to the mailing lists for organizations that will consolidate and disseminate recommendations and resources to support homeless students throughout the pandemic, including the National Center on Homeless Education, the National Association for the Education of Homeless Children and Youth, and SchoolHouse Connection.

Assess the living situations and other characteristics of students flagged as experiencing homelessness in their student record to help triage where the greatest support will be needed for these students to fully participate in distance learning. For example, students who are presently unsheltered or staying somewhere not meant for habitation may have a more difficult time participating in distance learning than students who are staying in an emergency shelter that is equipped with internet access.

Develop, implement, and distribute an assessment of each student’s needs related to distance learning that does not presume that students have stable or consistent housing. This assessment should be easy for parents or guardians to complete and guide them to resources to help meet basic requirements for participation in distance learning (e.g., a consistent place to do homework that allows students to concentrate).

Determine how existing or alternative transportation options could be deployed to meet basic student needs that would normally be met at school, such as delivery of meals, educational materials, or other resources.

Develop expectations for distance learning that do not require access to specific technology, including computers, telephones, or internet, and that specifies options for students who do not have access to these things.

Engage your local public health departments, county or Tribal human services departments, and Continuum of Care region on planning efforts to meet the needs of homeless students throughout the pandemic. With these local partners, develop protocols for how schools would identify and meet the needs of students experiencing homelessness in ways that are consistent with protecting student privacy, including the special provisions that apply in emergencies. Work with these partners to identify housing or safe quarantine options for homeless students whenever possible.

Engage your local libraries to assess their ability to help support students success with distance learning, including study spaces, computer access, mobile hotspots, and access to instructional materials.

Establish a hotline for students who may have difficulties participating in distance learning to use in connecting with school personnel who can help troubleshoot or identify options, ideally with the option to allow text messaging in addition to telephone calls.

Anticipate increased student support needs related to anxiety and trauma related to the pandemic.

Throughout the distance learning period, schools and school districts should:
• Implement expectations for distance learning that do not require students to check in or report attendance over video or audio connections, which may be infeasible in the setting where a student is located.
• Distribute guidance and supplies (e.g., soap) to help homeless students and families comply with recommended preventive health measures, social distancing, and other community mitigation efforts.
• Ensure that homeless students continue to have access to meals.
• Encourage students and parents to reach out if their living situation changes and to access additional support to promote every student’s ability to participate in distance learning.
• Ensure distance learning plans are accommodating of students who are highly mobile and/or experiencing homelessness.
• Monitor participation and engagement of homeless students in distance learning (e.g., including both attendance and performance) as a distinct group, to help guide whether additional staff support, engagement, or assistance are needed for students experiencing homelessness.
• Schedule leadership-level reviews of the efficacy of distance learning plans and approaches for homeless students, and consider alternatives or additional support needs as part of that review.
• Monitor emerging guidance or recommendations on supporting homeless students and implement changes as appropriate.
• Maintain regular contact with local public health departments, county or Tribal human services departments, and Continuum of Care planning bodies on ongoing or emerging needs and to connect to resources that can assist students and families experiencing homelessness. With these partners, identify housing or safe quarantine options for homeless students.

**Early Learning**

School-based early care and education programs such as voluntary prekindergarten and school readiness plus are expected to be included in your district’s distance learning plan.

**Voluntary Prekindergarten and School Readiness Plus**

Through the implementation of age-appropriate distance learning activities, programs will be expected to meet minimum hour requirements excluding the instructional hours that would have occurred during the ten day planning period. Read the guidance on creating a distance learning plan for prekindergarten children.

**School Readiness, Early Childhood Family Education Programming**

Community Education programs, such as Early Childhood Family Education (ECFE) and School Readiness, are not required to be included in your school district or charter school’s distance learning plan. Rather, districts and charters have the option to include their ECFE and School Readiness programs in their distance learning plan. Additionally, at the discretion of the school district or charter school, School Readiness programs serving 3- and 4-year-olds may continue to serve children of any critical worker included in the children of critical workers, as defined in the state list on-site, and charge fees per statute 124D.15 Subd. 12.
If ECFE or School Readiness programs are offered in a distance learning format, fees or tuition to parents/families are discouraged and if necessary, offered at a much reduced rate. If families have prepaid for the month of April, and decide to opt out, they must have the option to be reimbursed or credited for the missed weeks. In designing distance learning programming/services, districts should braid their funds. For example, ECFE funds may be used to support preschool distance learning efforts.

In the design and delivery of your distance learning program, it is recommended that programs carefully consider the impact of the COVID-19 pandemic on parents and families, exercising caution not to add additional stress or responsibilities to parents and families.

**Health and Developmental Screening**

At this time, programs offering Health and Developmental Screening may postpone services and work with MDE to extend deadlines if needed.

**Early Childhood Special Education**

Please see section on [Special Education Services – IEP and 504](#) for guidance.

**Early Learning Assessments**

The Commissioner of Education has waived the requirement for voluntary prekindergarten (VPK) programs [MN 124D.151](#) and for school readiness plus programs [MN 124D.15](#) to collect school year 2019-2020 exit data (i.e., data from the spring rating period). This requirement is being waived (1) so that teachers and administrators are able to attend to the most pressing needs of students, parents, and communities, (2) Kindergarten Entry Profile (KEP) approved assessments rely on teacher observations made during typical educational routines, and (3) the disruptions to routines experienced by children during periods of school closure and distance learning do not provide adequate opportunity for teachers to observe all that students are able to do.

MDE will provide guidance in the future on how to share your school year 2019-2020 fall and winter data as decisions are made.

Only the U.S. Department of Education’s Office of Special Education Programs (OSEP) has the authority to waive the responsibility of Early Childhood Special Education (ECSE) programs to report outcome data on behalf of infants, toddlers, and preschool children with disabilities. It is MDE’s understanding at this time that ECSE programs are still required to report either KEP-approved assessment data or OSEP Child Outcome Summary (COS) ratings for children who entered or exited during school year 2019-2020.

**Head Start Program**

The COVID-19 pandemic has prompted Head Start/Early Head Start to adapt their service models and support the needs of children, families, and staff in a different way. Programs across the state of Minnesota are beginning to implement creative strategies to stay connected to children and families. Resources to support at home learning and discovery to share with staff, families and child care partners can be found [here](#).
The Office of Head Start has issued guidance in response to supporting grantee’s questions about emergency child care during the COVID-19 crisis.

To support Head Start programs in this work, MDE has aligned the use of state Head Start funds with the Wages and Benefits guidance and flexibilities provided by the Office of Head Start. This does not apply to non-COVID-19 related program closures during which employees would not otherwise be paid, such as summer breaks. This flexibility remains in effect through June 30, 2020 or the date upon which programs reopen for center-based services, and employees return to regularly scheduled onsite work, if sooner. MDE will reevaluate this decision to continue flexibilities beyond June 30, 2020.

The Minnesota Department of Education applauds the creative measures Head Start/Early Head Start programs are implementing. Continue to engage families and to deliver services to the extent possible, remotely, using these Minnesota Department of Health resources to prioritize the safety of children, families and program staff.

**Early Learning Scholarships Program**

MDE will ensure children and programs who receive early learning scholarships will continue being served and funded. Please see guidance below.

- Absent days will not be counted towards the 25 maximum absent days policy in order for families to make individual decisions that are best for their families. Absent days should be reported on invoice forms and in the Early Learning Scholarship Administration System (ELSA), but effective 3/16/2020, will not be counted towards the maximum number of absent days until further notice. Families will not need to submit a medical exemption form.

- Programs that temporarily closes due to response to COVID-19 mitigation, regardless of program type, will have closure days waived for the duration of the crisis. Programs receiving Pathway II funds can continue to request payment for the slot in the same frequency and manner they previously requested. Programs receiving Pathway I scholarships may continue to invoice the Area Administrators. All program types that make the decision to close as a measure to help control the spread of COVID-19 may have closure days waived from the current maximum, effective until further notice. For closures, programs should enter their original number of scheduled days and enter the number of closure days on the Invoice Form and in the Early Learning Scholarships Administration (ELSA) system. Children should not be reported as absent during a closure day.

- As funds allow, a child’s scholarship temporarily may be increased if the program regularly attended closes, and the child attends another eligible program as back-up. This will reduce the risk of the first program losing revenue and the family losing funds from their scholarship if used at a program they are unable to attend. This may be a particular need for health care or emergency workers. This would allow some children to have more than $7,500 for the current scholarship year. MDE will work with Area Administrators to maximize the use of all funding to support this action. MDE will provide Area Administrators modified planning forms to support this effort to ensure the new program being used is
set up for payment. ELSA procedures for paying two programs are yet to be determined; Area Administrators will receive specific instruction from MDE program staff as applicable once available.

Additional Information

Guidance/Resources to Support At Home Learning and Discovery:

- MDE parent guides with activities that are aligned with the ECIPS. The parent guides are available at: [https://education.mn.gov/MDE/dse/early/ind/](https://education.mn.gov/MDE/dse/early/ind/) (scroll to the bottom of the page under “Translated Documents”)
- Family activities under STEM video series from ZERO TO THREE (ZTT) at: [https://www.zerotothree.org/resources/series/let-s-talk-about-stem-video-series](https://www.zerotothree.org/resources/series/let-s-talk-about-stem-video-series)
- Scholastic Learn at Home provides 20 days’ worth of active learning journeys designed to reinforce and sustain educational opportunities for those students who are unable to attend school.
- Screen Sense, a set of research-based materials from Zero to Three
- Including the E-AIMS model for choosing media content for children
- NAEYC’s Position Statement with the Fred Rogers Center, on Young Children and Technology
- Recognizing the importance of quality, developmentally appropriate content and of co-viewing and joint media engagement with parents/adults/family members
- The U.S. Department of Education’s Early Learning and Educational Technology policy brief (which is based in part on recommendations from the American Academy of Pediatrics, NAEYC, and others)
- Award-winners in the Excellence in Early Learning Digital Media category developed by the Association for Library Service to Children (a branch of the American Library Association)

Assessment

Statewide Assessments

Contact [mde.testing@state.mn.us](mailto:mde.testing@state.mn.us) for further questions about statewide test administrations.

Waiver

MDE has applied for the federal waiver from administering statewide assessments as required by federal law. It is available for public comment on MDE’s [COVID-19 webpage](https://education.mn.gov/MDE/dse/early/ind/). Note: The federal waiver does not apply to the ACCESS and Alternate ACCESS tests that were started or completed. MDE is working with DRC to score and report ACCESS and Alternate ACCESS test results for students.
Closure of Testing Windows

Based on the March 25 announcement and Executive Order by Governor Walz, any available open statewide assessments (MCA and MTAS) will close on Friday, March 27, 2020, at 5 p.m. This means that there will be no more MCA and MTAS tests administered for the remainder of the 2019–20 school year. It also means that majority of the work related to administration of statewide assessments must also be completed by District Assessment Coordinators (and/or relevant staff) by Friday at 5 p.m. including the following prioritized tasks:

1. **Data entry.** Any student responses from MCA paper tests must be entered online in TestNav, and any MTAS scores must be entered in PearsonAccess Next.
2. **High school science only.** Since a blank assessment record cannot be added in Posttest Editing for high school science, add any student who would have taken the High School Science MCA (based on their enrollment in a life science or biology course) to a test session in PearsonAccess Next. No other action is needed other than setting up a test session (if not already created) and adding those students to it. The session does not need to be prepared or started, and tests do not need to be marked complete.
   - Similarly, for any students who would have the High School Science MTAS, submit a blank MTAS assessment in PearsonAccess Next in order to create an assessment record for Posttest Editing.
   - Creating these assessment records allows flexibility for Posttest Editing and for next year’s precode files.
   - Note: This only applies to high school science; no additional work in PearsonAccess Next needs to be completed for any other grade or subject.

Note: It is not necessary to enter refusal (REF-P or REF-S) or medical excuse (ME) test codes in PearsonAccess Next. MDE does not yet know how test codes will be used or applied based on the waiver.

Return of Test Materials

As has been communicated, Friday, March 27, is the deadline for returning ACCESS and Alternate ACCESS test materials. It is important to return paper materials by the deadline so that they can be scanned, scored, and included for reporting.

For MCA and MTAS test materials, secure test materials do not need to be returned by Friday, March 27. Additional information regarding return timelines for these secure materials will be provided in this document.

Implications

MDE is aware that there will be several programs and systems impacted if sufficient statewide assessment data is not available (e.g., English Learner exit criteria, Literacy Aid). MDE will be using March 16-27 to identify all of those impacted as well as develop options. We will be sharing those plans as they become available.

Minnesota College Entrance Exam Requirement

Based on the March 25 announcement and Executive Order by Governor Walz, districts unable to fully implement the requirement to offer a school-day administration of a college entrance exam are exempt from
this requirement for school year 2019–20. MDE will provide additional guidance to schools and school districts no later than the beginning of school year 2020–21.

Note: The money allocated for school year 2019–20 reimbursement of a college entrance exam will carry forward and will be available to be used for 2020–21 reimbursement.

- For more information about national test dates for ACT, districts should refer to the Frequently Asked Questions section of the ACT website (https://www.act.org/content/act/en/covid-19.html).
- For information about national test dates for SAT, refer to the Newsroom section of their website (https://www.collegeboard.org/press).

Communication

Based on MDE’s agency-wide communication plan due to COVID-19, the Assessment Update and Testing 1,2,3 Newsletter must be discontinued until further notice. Contact mde.testing@state.mn.us for further questions about statewide test administrations.

Other assessments

For information or resources are related to Advanced Placement (AP) testing, contact College Board. The College Board coordinates Advanced Placement (AP) and SAT exams https://pages.collegeboard.org/natural-disasters

For information or resources are related to International Baccalaureate (IB) Organization testing, contact International Baccalaureate Organization. They addresses coursework deadlines, completing assessments, examinations, authorization and evaluations https://www.ibo.org/news/news-about-the-ib/covid-19-coronavirus-updates/

NAEP 2019-20

The Age 17 Long-Term Trend Assessments (scheduled for March 16–May 22) have been canceled across the nation due to COVID-19 closures. For any questions related to NAEP, contact Jenny Cain at jennifer.cain@state.mn.us.

Before and After Care

All before- and after-care/school age care programs provided in schools (either by the school district or charter or by a community partner) are suspended until in-person school resumes.

MDE strongly recommends that all districts and charters identify and coordinate with any community partners that provide before- and after-care programs and send communication to families regarding their options for before- and after-care.
PSEO and Concurrent Enrollment

Postsecondary Enrollment Options (PSEO) Program

When college and university courses recommence, PSEO students will resume any courses in which they are enrolled through alternative delivery methods including online and other formats that support safe social distancing (≥ 6 ft.). Postsecondary faculty will be communicating the process to their students for continued learning in their courses. PSEO students should monitor all college or university communication daily for information about the continuation of learning in each of their courses and resume regular participation and attendance as instructed.

Students who plan to enroll in PSEO during the 2020-2021 school year must notify the districts or charter schools of their intent to enroll by May 30. Schools should consider how interested students can communicate with their counselors to plan for PSEO course enrollment. Schools should also consider waiving the May 30 requirement in section two of the form if collecting the necessary signature(s) is challenging for students and families during the remainder of this school year.

For MDE additional guidance for PSEO students, access COVID-19 Guidance for PSEO and Concurrent Enrollment Students.

Or, access guidance from PSEO postsecondary systems: Minnesota State colleges and universities or University of Minnesota.

Concurrent Enrollment / College in the Schools Courses

Concurrent enrollment courses are college courses. Districts and charter schools offering these courses must work directly with the concurrent enrollment director at the postsecondary institution on how these classes will move forward in order to meet higher education requirements and standards.

The high school or district, in collaboration with colleges and universities, may provide access to college or university online course platforms or software if feasible. If high schools or school districts already use an online platform that supports the continuity of instruction, these alternate platforms may also be utilized if feasible.

If high school instruction resumes at the high school site earlier or later than at the college or university, concurrent enrollment instruction should resume according to the high school schedule.

For additional guidance for concurrent enrollment programs, access COVID-19 Guidance for PSEO and Concurrent Enrollment Students.

Or, access guidance about concurrent enrollment from postsecondary systems: Minnesota State colleges and universities or University of Minnesota.
High School Equivalency/GED Testing and Records

GED Testing

GED testing is overseen by GED Testing Service and Pearson VUE. This is guidance about GED testing from Pearson VUE and GED Testing Service (March 18, 2020):

Subject: Coronavirus/COVID-19 Communication from GED Testing Service

We understand that test centers, educators and GED students may be concerned about COVID-19 (Coronavirus) and how it may impact GED testing. At this time, many GED test centers in Minnesota are closed based on local school district closures. A limited number of private test centers, plus Corrections, are operating normally and are using standard precautions.

Test centers that deliver the GED are advised to make any closure decisions based upon information provided by local and state authorities and government agencies. Test centers that decide to close for any period of time should notify Pearson VUE immediately, so that they can cancel tests appointments and notify students of their test cancellations as quickly as possible. Test centers should call 1-866-389-3665, option #2 to report a closure.

Students who are impacted due to test center closures will receive notification that their test has been cancelled and their testing fees will be refunded. Students can reschedule their test on GED.com for when the testing site has reopened, or at another open test center.

We are committed to the safety or GED test-takers and test center workers. We will continue to monitor the situation and provide additional information as needed.

Requesting GED Records from the Minnesota Department of Education

People can request a GED diploma or transcript by completing and submitting a GED Records Request. The GED Records Request form can be found online at the Minnesota Department of Education website (http://education.mn.gov) and then searching for “GED Records Request” in the search box on the right side of the page.

The one-page request form lists three options for submitting the request:

1. Email a completed form to Alice Smith (alice.smith@state.mn.us);
2. Fax the completed form to 651-582-8458; or
3. Mail the completed form to:
   GED Office
   1500 Highway 36 West
   Roseville, MN 55113-4266

GED records will be sent out from our office via U.S. Mail, typically within three business days of receiving the request.
Please note the Minnesota Department of Education does not allow GED diploma holders to pick up GED records at the Minnesota Department of Education to help ensure public and staff safety. Until further notice, we will also not be allowing people to create appointments to pick up records.

GED Questions

If you have questions about GED testing or obtaining GED records earned in Minnesota from our office, please contact us:

- Alice Smith (alice.smith@state.mn.us or 651-582-8446)
- Brad Hasskamp (brad.hasskamp@state.mn.us or 651-582-8594)

Communication

MDE will communicate with superintendents and school leaders via GovDelivery.

In communicating with families, your community, community partners* and local media, keep in mind the following:

- When and how to expect communication from the district
- Where they can find the distance learning plan on your website (must be posted on website by Friday, March 27, before distance learning begins)
- What is the structure of distance learning in your district?
- When will educators and school leaders be available and how can they be reached?
- How will students be able to retrieve their belongings from school (from lockers, etc.)?
- Student expectations (attendance, assignments, hours, due dates, etc.)
- Reminder about Student Information System and how to sign up
- How to access meals
- How to access telehealth
- How to access best practices around health from MDH

*Community partners often include (but not limited to): first-responders, local government, elected officials, nonprofit organizations, libraries, businesses, child care centers, associations

Language Access

Every family deserves access to the information provided by their district or charter school. Language translations and interpretations of this information should be made available as quickly as possible.

Contracted Services

When communicating with contracted service providers, consider what aspects of your regular service will be changing (school lunch menu, busing services, etc.)
Communication to Staff:

- Expectations on how they will report their attendance
- Expectations around staff presence at each building

Tribal Considerations

As you are making decisions, please ensure you are coordinating with local and regional Tribal leaders. Tribal Governments are sovereign nations, and they maintain a unique political status. Each will be making decisions based on what is best for their citizenry. Be aware of how school closures may impact Tribal communities and Tribal governments. This school closure plan provides unique opportunities to the state, school districts, schools, and local governmental agencies to meet the needs of all Minnesotans at this time.

School districts and charter schools should designate an Indian Education staff member as point person for communications and updates to American Indian families in your schools. This will enable you to enhance your standard communications using culturally responsive practices. This designee should be included in any and all Covid-19 planning and leadership meetings. The designee will provide input and feedback related to the needs of American Indian students and families in your district or charter school.

School districts and charter schools should consult with local Tribal leaders, city and county governmental agencies, volunteer organizations and private sector companies to ascertain how students’ needs will be identified and met. This may include resource distribution, mental health needs, and educational opportunities in your communities. These considerations offer the opportunity to ensure that parents, families and Tribal Nations are meaningfully engaged in solutions and the implementation of services for our students and for all Minnesotans.

For assistance, work with your Indian Home School Liaison, Indian Education staff, and parent committee. Contact MDE’s Office of Indian Education for a list of Tribal Education Directors.

Tribal Consultation under ESSA

All schools and districts that are required under the Every Student Succeeds Act (ESSA) to consult with Tribal Nations must also collaborate with the Tribal Nations Education Committee (TNEC) members regarding the formulation of their distance learning plans. This meaningful collaboration should include Indian Education staff and TNEC members in the preparation and implementation of distance learning in your districts or schools.

All distance learning plans will need to be submitted to the Tribal Liaison in the Office of Indian Education on or before March 24 in order for the Tribal Nations to review them for equitable services to American Indian students. Superintendents will be apprised of this information today in their daily meeting with Commissioner Ricker.

The pursuit of educational equity recognizes the historical and contemporary conditions and barriers that have prevented opportunity and success in learning for students based on their race/ethnicity, income, and other social conditions.
**Broadband Access**

If broadband access is an issue for households in your school district, here are links to resources and options that may be available in your area.

- **Contact your local broadband provider(s):**
  - List of broadband providers by county (with contact information): [https://mn.gov/deed/programs-services/broadband/maps/data.jsp](https://mn.gov/deed/programs-services/broadband/maps/data.jsp)
  - For help identifying providers in your area:
    - Minnesota Cable Communications Association: 651-493-0716
    - Minnesota Telecom Alliance: 651-288-3723
    - Satellite Industry Association: 202-503-1560
    - Wireless Infrastructure Association: 703-739-0300
    - WISPA (fixed wireless providers): 407-319-0062

- **Many companies are offering service options related to COVID-19.** Visit the Office of Broadband Development’s website and see their list of companies offering service for more information.

- **Minnesota Office of Broadband Development**
  - For assistance identifying broadband service options or connecting with broadband providers, please call or email:
    - 651-259-7610
    - Deed.broadband@state.mn.us
  - K12 Connect Forward Program: [https://mn.gov/deed/programs-services/broadband/connect-forward/](https://mn.gov/deed/programs-services/broadband/connect-forward/)

**Libraries**

The American Library Association reiterates the valuable role of libraries in combatting misinformation and providing equitable access to information during this evolving crisis and provides recommendations for libraries. The Minnesota Library Association states its support for ALA’s recommendations. The Minnesota Department of Education encourages library leaders to review the information provided in order to make informed decisions.

Closing a library is a local decision made by cities, counties and/or regional public library systems. Scheduled library programs and bookmobile service may be cancelled and meeting rooms may be closed while the library performs limited activities. In addition, a library may reduce in-person services, instead interacting with patrons via phone and email. In its capacity of offering guidance to public libraries, MDE has several suggestions for libraries that choose to remain open during this exceptional and difficult time for our communities.

Online and from home, visit eLibrary Minnesota for a wide range of free resources that support learning. Review what’s available:

- **K-12 Student resources** (Elementary, Middle School, High School)
- **eBooks Minnesota** (especially elementary age and a selection in languages other than English)
- Your local library may have additional online resources available.
Many libraries have play spaces or special areas where young children congregate. The presence of young children gathering in the library may increase as schools shift to distance learning. If your library stays open, you can take extra precautions with cleaning during this time.

Library Cleaning Guides & Resources

- Centers for Disease Control. [Cleaning recommendations from the CDC](https://www.cdc.gov/coronavirus/2019-ncov/community/guidance.html)
- National Association for the Education of Young Children. [Cleaning, Sanitizing, and Disinfection Frequency Table](https://www.naeyc.org/policy/infants-toddlers/)
- Environmental Protection Agency. [Green Cleaning Toolkit for Early Care and Education](https://www.epa.gov/greenbuilding/green-cleaning-toolkit-for-early-care-and-education)
- Association of Library Services to Children. [Best Practices for Cleaning Play and Learn Spaces](https://www.ala.org/ala/mgrm/guides/bestpractisesforcleaningplayandlearnspaces)

To care for staff:

- Follow guidelines from the Minnesota Department of Health and Centers for Disease Control related to quarantining, surface cleaning and social distance, including increased use of maintenance protocols.
- Remind employees to wash their hands frequently, and provide hand sanitizer throughout your facility. Wipe down all counter tops and other surfaces (copy machines, printers, etc) frequently with sterilizing wipes.
- Train volunteers and staff to limit physical contact with visitors. Remind staff or volunteers to stay home if they have any signs of illness.
- If possible, take steps now to prepare your staff for remote work if a closure is ordered, and ensure you have an emergency communication system.
- Cancel programs, events and meetings, or offer using remote means.
- Limit number of people allowed in the library at one time.
- Remove chairs.
- Remove items that can’t be wiped clean – puppets, things made out of fabric or anything that would be burdensome to clean frequently.
- Provide reference assistance via phone and email rather than in person.
- Provide circulation services in a capacity that reduces direct contact with patrons.

To serve patrons:

- Partner with district or charter schools to better understand the educational needs of students and to ensure your needs understood.
- Consider keeping Wi-Fi open 24/7 to support people without home access.
- Consider increasing bandwidth to support additional online use.
- Remove fines for late materials.
- Consider deploying mobile hotspots to libraries in areas of the state that have insufficient home internet access. Contact the MN Office of Broadband to identify locations, and use Minitex (if open) for delivery.
- As space permits, move computers from closed lab spaces to open areas that allow for social distancing.
If a library remains open, children and families may find:

- On site computers, the internet and Wi-Fi. Some may have computers that can be checked out for home use.
- Free access to books, DVDs and other materials in languages other than English.
- Educational and recreational materials, in print and online (also available from home)
  - Books
  - Magazines
  - Streaming video
  - DVDs
  - Music
  - Newspapers
- Wi-Fi Hotspots may be available to check out for home use.
- Staff that support learning and equitable access to information. You may also find staff that are fluent in languages other than English.

**Activities**

All in-person school-sponsored activities that are scheduled during the statewide school closure are suspended until in-person school resumes.

**Staff**

During your planning week, provide training to staff (including: classroom teachers, paraprofessionals, administrators, school support staff) on distance learning practices.

Consider how you will utilize staff in a virtual way: can calls be forwarded during school hours?

Because districts and charters will be receiving full funding for providing distance learning, it is expected that all staff, including non-salaried, hourly staff, will earn pay and benefits as planned in the school budget and bargaining agreements. Likewise, if calendars are extended to accommodate school reopening, districts and charters are expected to provide full pay and benefits for that period as well as they will be receiving full funding.

**Funding**

MDE’s Emergency Operations Plan includes provisions for ensuring ongoing payments and other school district supports in the event of emergency situations such as a widespread infectious disease outbreak. Regularly scheduled cash outflows to districts will not be disrupted due to an infectious disease outbreak closure. Aid payments are not expected to change due to the loss of instructional days. General education revenue will be calculated as if students received instruction on those days. Federal payments are made through the SERVS system on a draw/reimbursement basis. To the extent that expenses are incurred during this period, draw
requests will be processed on a weekly basis according to the normal schedule. No disruption to SERVS payments are anticipated.

If your district has an Emergency Operation Plan, you should promptly familiarize yourself with its procedures to make certain your district can continue performing its essential functions if its leadership and key staff are unable to perform their duties due to closure. Your Emergency Operations Plan and other planning should include provisions to ensure your payroll processes will continue.

Be mindful of vendors who are seeking to take advantage of this crisis. If it seems too good to be true, it is. If you suspect a vendor is fraudulent, please notify the Minnesota Attorney General’s office.

**Employment and Workforce**

The Minnesota Department of Employment and Economic Development is developing guidance on how to mitigate impacts of school closure on family employment and community economic impact, particularly for parents and families in the healthcare industry.

**Resources from the Minnesota Department of Health**

- Distance learning: Clean devices (iPads, laptops) that you touch frequently like you do for all high use areas in homes
- Social distancing practices still apply (avoid gatherings of 10+, maintain 6 feet of distance)
- Discourage from gathering in other public places while school is dismissed.
- Resources to help understand COVID-19 and steps you can take to protect yourself and your family:
  - CDC’s health communication resources
  - CDC information on stigma and COVID-19
  - CDC information on COVID-19 and children
  - CDC offers several free handwashing resources that include health promotion materials, information on proper handwashing technique, and tips for families to help children develop good handwashing habits.
  - Other health and education professional organizations may also have helpful resources your school can use or share, such as the American Academy of Pediatrics
  - CDC’s information on helping children cope with emergencies
  - Stigma prevention and facts about COVID-19
  - Minnesota Department of Health COVID-19 website

**Contact Information**
