World’s Best Workforce Goal #1: All Children Ready for School
Examples of Goals, Strategies, Indicators, and Data Sources

The Minnesota Department of Education (MDE) is dedicated to supporting districts in creating and reaching goals for World’s Best Workforce requirements. This document is meant to provide guidance and examples of goals and indicators where districts already collect information from existing programs and have a statutory requirement for specific data.

Minnesota’s school readiness definition, the agreed-upon expectations at kindergarten entry, can be found in this packet of resources and is designed to highlight that children are ready to enter kindergarten according to these stipulations in Minnesota Statutes:

- Child is at least 5 years of age by September 1st of the child’s enrollment year (120A.20)
- Child has received early childhood screening (121A.17)
- Child has received medically acceptable immunizations (121A.15)

This document outlines some of the data collected at the district level and can be used to formulate goals and measure progress for WBWF Plans and Reports. The goal of this brief is to provide options from which districts can choose as the template for their School Readiness Goal and categorize the menu of goals according to two classifications; child-level targets and system-level targets. Districts may choose to use any or all of these templates, but these examples are not meant to be inclusive of all possible goals, which will be accepted for this mandate.

If you have questions about specific programs and data, please contact the following MDE staff to assist you.

- Voluntary Pre-Kindergarten (VPK) and School Ready Plus (SRP) - June Reineke
- Early Childhood Family Education (ECFE) and School Readiness Programs - Mike Brown
- Kindergarten, Kindergarten Entry Profile (KEP), and Early Childhood Assessments - Jon Vaupel
- Early Childhood Screening (ECS) - Margo Chresand
- Early Education Student or MDE Org - Avisia Whiteman
- Head Start - Jeanne Dickhausen
- Early Childhood Special Education - Lisa Backer
- Early Childhood Data - Avisia Whiteman
- Early Childhood Longitudinal Data System - Anita Larson

| Increase the percentage of children meeting age expectations for children enrolled in Pre-K programs | In SY 2017-18, student assessment results showed a 10-point gain in assessment scores from program entry to program exit. For SY 2018-19, student assessment scores will increase by an average of ____ points across programs. | • Teachers use ongoing assessment data to adjust instruction.  
• District staff use assessment data to assist in choosing professional development (PD) for teachers and staff.  
• Teachers share instructional strategies in Professional Learning Communities (PLCs). | Percent of children meeting or exceeding age expectations at entry and exit of program. | Student assessment data |
| Increase the percentage of children who receive an Early Childhood Screening (ECS) | In SY 2017-18, ____ percent of children were screened between their 3rd and 4th birthday. For SY 2018-19, the percent of children screened between their 3rd and 4th birthday will increase to ____ percent. | • District staff view the Early Childhood Screening Outreach Strategies Training and implement strategies based on local needs.  
• Coordinators use Early Childhood Family Education Community Assessment data to increase access to screening locations and times for all families, especially those with the highest needs.  
• District staff provide Screening Outreach information in the languages of community in a variety of formats. See printable ECS brochures in 7 languages.  
• District staff collaborate with local Head Start, Child and Teen Check Ups (public health) and clinics to assign MARSS PS records to comparable screenings. | Percentage of 3 year olds screened each year | MARSS |
| Ensure seamless transitions from community-based Early Childhood Education (ECE) programs to kindergarten | In SY 2017-18, no data was collected on transitions to kindergarten. For SY 2018-19, ____ percent of families will receive kindergarten transition plans.  
In SY 2017-18, no kindergarten teachers visited community-based ECE programs. For SY 2018-19, kindergarten teachers will visit ___ (# of) community-based ECE programs.  
In SY 2017-18, no joint PDs with community-based ECE programs were provided. For SY 2018-19, the number of joint PDs offered with community-based ECE programs will increase to ___ (# of). | • Create written coordination agreements between the district and community-based ECE programs.  
• Produce a written and accessible district policy around transition (which may include contact information).  
• Develop a transition plan template (used by all students and families).  
• Families sign an acknowledgement that they received transition-planning documents.  
• Document the number and percent of pre-kindergarten students and families who attend transition events. | • Percent of families who acknowledge receipt of transition plan  
• Number of families who attend transition activities sponsored by pre-kindergarten programs | District records |

| Increase the percent of children proficient on the Kindergarten Entry Profile (KEP) assessment tool name | In SY 2017-18, ___ percent of children in our district were reported as meeting/exceeding age expectations across all domains of learning on the [KEP assessment tool name]. For SY 2018-19, the percent of children reported proficient on the [KEP assessment tool name] as meeting/exceeding age expectations across all domains of learning will increase to ___ percent. | • Enroll in the KEP initiative and select one of the approved assessment tools.  
• Collect assessments online.  
• Ensure that teachers and other staff are trained on the use of the assessment tool.  
• Develop a PLC focused on the assessment tool and how the data that the tool collects/produces can be used to inform practice. | • Online KEP approved assessment tool reports  
• MDE’s analysis of KEP participants assessment tool data | • District-selected KEP assessment tool  
• MDE analysis of the district’s KEP data |
| Increase enrollment in early learning programs                         | In SY 2017-18, there were ___ (# of) preschool slots. For SY 2018-19, the number of preschool slots will increase by ___ (# of) preschool slots.  
In SY 2017-18, ___ percent of children were enrolled in preschool. For SY 2018-19, enrollment in preschool will increase to ___ percent. | • Outreach to ensure all early learning program slots are filled.  
• Conduct a community needs assessment to determine the appropriate number of early learning program slots.  
• Blend and braid funding streams.  
• Partnerships with community early childhood programs to increase slots.  
• Number of available slots in preschool settings. | • Number of available slots in preschool settings  
• Number of referrals to preschool programs | • Enrollment data for School Readiness, Voluntary Pre-Kindergarten, Early Childhood Family Education, and Head Start  
• School Readiness annual data submission to MDE |
| Increase the percent of children who are fully immunized at kindergarten entry | The percent of children fully immunized at kindergarten entry in SY 2017-18 was ___ percent. For SY 2018-19, the percent of children fully immunized at kindergarten entry will increase to ___ percent. | • Partner with clinics and local public health agencies to coordinate services.  
• Coordinate immunization information and requirements with school-based early childhood programs and other community programs. | • Immunization records have been submitted prior to the start of kindergarten. | • Pupil Immunization Records/Annual Immunization Status Report (AISR)  
• MIIC (Minnesota Immunization Information Connection) |
