Introduction

Minnesota’s K-12 Academic Standards are statewide expectations for student learning in K-12 public schools. School districts and charter schools are required to teach these standards to ensure that all Minnesota students have access to high-quality content and instruction. An academic standard is a summary description of student learning in a content area and are comprised of one or more benchmarks. A benchmark supplements the standard and is the specific knowledge and/or skill that a student must master to meet part of an academic standard by the end of a grade level or grade band.

Academic standards are not curriculum. Curriculum are the resources, assessments, learning experiences, and plans that educators utilize at the local level to instruct students on the content of the academic standards. By statute (Minn. Stat. § 120B.021, subd. 2(b)), Minnesota academic standards do not require a specific curriculum. Districts, schools, and educators make curriculum and instruction decisions to support the teaching and student mastery of standards. As a result, local school districts, schools and educators choose what curriculum is used and what classes are taught in their schools to ensure that students meet the academic standards. Ultimately, local educators make the decisions about “how” to deliver instruction to meet the rigorous learning expectations of the academic standards.

In order to develop Minnesota’s rigorous academic standards, Minnesotans with content knowledge from varying perspectives and backgrounds draft the academic standards for Minnesota public schools. The process of reviewing and revising academic standards begins with the formation of a standards committee. Any Minnesotan may apply to serve on a standards review committee. For the Social Studies standards, an application period was open from March 2 to June 30, 2020 for Minnesotans to apply to participate in the social studies standards committee. In July 2020, the committee was selected.

The Minnesota K-12 Academic Standards in Social Studies committee has 36 members, and is comprised of K-12 teachers, administrators, college faculty, informal educators and community members. Minnesota Statutes outline who must be represented on the committee, including parents, currently licensed and in the classroom teachers, licensed school administrators, school board members, post-secondary institution faculty teaching core subjects, and business community members.

The Social Studies content-area empowers learners to become inquisitive, informed, and engaged members of society who use critical thinking, inquiry, and literacy to prepare for civic life, college, and careers. The review process centers on making revisions to the standards in social studies that will help prepare Minnesota students to learn, live, work and thrive in local and global societies.
In the first draft of the social studies standards, the work was centered on the standards themselves and did not include detailed supplemental benchmarks. The feedback and public comments from the first draft helped to inform the revision of the standards for draft two. Details were then added to the standards through supplemental grade level benchmarks. The benchmarks included in this second draft provide detailed descriptions about the knowledge and/or skill that students must master to meet part of an academic standard.

This second draft of the Minnesota K-12 Academic Standards in Social Studies represents the work of the standards review committee since their first meeting in September 2020.

We encourage all Minnesotans to provide feedback about this draft of the standards and benchmarks via an online feedback survey from July 30 – August 16. A public comment survey is available and Minnesotans can find additional information, including a questions and answers document, on the MDE social studies webpage. At the conclusion of the public comment period, the committee will review the feedback from the survey and continue to revise for a future draft.

Organization of the Social Studies Standards

The Minnesota K-12 Academic Standards in Social Studies are statewide expectations for student learning in K-12 public schools. Academic standards contain one or more benchmarks at each grade-level. A benchmark is a supplement to the standard and is the specific knowledge and/or skill that a student must accomplish to meet part of an academic standard by the end of each K-8 grade-level. The social studies standards and benchmarks for the high school are grade-bands that are developed to provide structure for the content students must meet in the three and a half credits required for graduation. At the high school level specifically, the standards do not correlate to specific course names. The standards are the knowledge and/or skills that students must master to meet graduation requirements, and can be taught through locally determined courses.

The academic standards and their supporting benchmarks are organized into five strands: Citizenship and Government, Economics, Geography, U.S. and World History, and Ethnic Studies. The contributions of Minnesota’s American Indian tribes and communities are integrated into each strand and all standards. Each of the strands have between three and six standards.

This second draft integrated technology and information literacy consistent with the ITEM (Information Technology Educators of Minnesota) 2019 standards, which are required by Minnesota statute.

Ensuring that the standards reflect Minnesota’s student population is a lens that has been used throughout the standards review process. This includes the interdisciplinary study of the social, political, economic, and historical perspectives of the diverse racial and ethnic groups in America.
The standards have also been reviewed to identify consistency in skills and knowledge across the subject areas, specifically with the English language arts (ELA) standards. When the ELA standards were revised in 2020, Literacy in History (2010) was removed and replaced with information and technical text; therefore, a workgroup of the committee reviewed the 2020 ELA Standards to ensure consistency and make connections with that document to create cohesion in learning for students.

Finally, the alignment of content within a grade or grade level was explored. This was done to ensure that the learning was connected within a grade through themes rather than a collection of individual concepts. The themes at each grade level are:

- K - Family and Community
- 1 - My Role in Many Communities (local - global)
- 2 - Interconnections between peoples and environments
- 3 - Connections between choices and consequences in the past and today
- 4 - Perspectives and Decisions
- 5 - Investigating issues and perspectives in order to strengthen the community
- 6 - Minnesota Studies
- 7 - U.S. Studies
- 8 - Global Studies

The social studies standards are grounded in current research. The *College, Career, and Civic Life (C3) Framework for Social Studies State Standards: Guidance for Enhancing the Rigor of K-12 Civics, Economics, Geography, and History* is being used in revising the standards. The standards also include personal finance and/or financial literacy.

As outlined in the 2020-21 Social Studies Standards Committee’s Guiding Assumptions, the committee is taking into account:

1. Designing standards that ensure opportunities for students to demonstrate an understanding of ideas, concepts, theories, and principles from the social studies disciplines by using them to interpret and explain specific, concrete information or events.
2. Designing standards that represent diverse points of view, experiences, and approaches to problem solving.
3. Designing standards using language that promotes culturally sustaining learning and that reflect students’ cultural backgrounds.
4. Designing standards that provide students with multiple ways of demonstrating competence in social studies.

The second draft also represents a purposeful integration of skills and content. This ensures opportunities for students to demonstrate an understanding of concepts and principles from the social studies disciplines by using them to interpret and explain specific, concrete information or events as well as focus on the disciplinary skills and processes within social studies. The embedding of Inquiry Practices and Processes reflects the *College, Career, and Civic Life (C3) Framework for Social Studies State Standards: Guidance for Enhancing the Rigor of K-12 Civics, Economics, Geography, and History* published by the National Council for the Social Studies.
Reviewing the Second Draft

In reviewing and providing feedback, the following questions should be kept in mind:

1. How well will the standards and benchmarks encourage improved social studies teaching and learning?
2. How well does the sequence of benchmarks from grade to grade build student learning toward civic life, college, and careers?
3. How well do the standards and benchmarks provide a clear expectation of the knowledge and skills for learning?

The standards are coded to allow for the specific feedback on benchmarks as well as general feedback. A code is utilized for each of the benchmarks:

Code: Number = grade level.strand.standard.benchmark
For example 3.1.4.1 = grade level 3, strand 1, standard 4, benchmark 1

In the code, “9” denotes a benchmark satisfactorily completed in high school as determined by a local district or charter school.

Strands:

1 – Citizenship and Government (Standards 1-6)
2 – Economics (Standards 7-12)
3 – Geography (Standards 13-17)
4 – History (Standards 18-21)
5 – Ethnic Studies (Standards 22-24)

Standards:

1. Apply civic reasoning and demonstrate civic skills, including civic discourse, for the purpose of informed and engaged lifelong civic participation.
2. Explain democratic values and principles that guide governments, societies, and communities, and analyze the tensions within the United States constitutional government.
3. (Rights and Responsibilities) Explain and evaluate rights, duties and responsibilities in democratic society.
4. (Governmental Institutions and Political Processes) Explain and evaluate processes, rules and laws of governmental institutions at local, state, tribal and federal levels.
5. Analyze how public policy is shaped by governmental and non-governmental institutions, and how people and communities take action to solve problems and shape public policy.
6. Evaluate the unique status, relationships and governing structures of Indigenous nations and the United States.
7. Use economic models/reasoning and data analysis to construct an argument and propose a solution related to an economic question. Identify the cultural lens/agency of decision-makers; consider the impact of a decision on various communities affected by the decision.

8. Analyze how scarcity and artificial shortages force individuals, organizations, communities and governments to make choices and incur opportunity costs, and how their decisions affect economic equity and efficiency.

9. Apply economic concepts and models to develop individual and collective financial goals and strategies for achieving these goals, taking into consideration historical and contemporary conditions that either inhibit or advance the creation of individual and generational wealth.

10. Explain and evaluate how resources are used, and how goods and services are distributed, within different economic systems. Analyze how incentives influence the decisions of consumers, producers and government. Evaluate the intended and unintended consequences of these decisions from multiple perspectives.

11. Measure and evaluate the well-being of nations and communities using a variety of indicators. Explain the causes of economic ups and downs. Evaluate how government actions affect a nation’s economy and individuals’ well-being within an economy.

12. Explain why people trade and why nations encourage or limit trade. Analyze the positive and negative consequences of international trade and globalization on communities and the environment.

13. Apply geographic tools and cultural perspectives to solve problems using geographic inquiry.

14. Describe places and regions, explaining how they are influenced by power structures.

15. (Human Systems) Analyze patterns of movement and interconnectedness within and between cultural, economic and political systems from a local to global scale.

16. Evaluate the relationship between humans and the environment, including climate change.

17. Explain sense of place through ways of knowing (culture) and ways of being (identity) from different perspectives, centering Indigenous voices.

18. Evaluate dominant and non-dominant narratives about change and continuity over time, taking into account historical context, i.e., a) how and why individuals and communities created those narratives; and b) why some narratives have been marginalized while others have not.

19. Recognize diverse points of view and develop an informed awareness of how our positionality (i.e., gender, race, religion, culture, class, geography, etc.) influences historical perspective.

20. Investigate a variety of historical sources and evidence by: a) identifying primary and secondary sources; b) considering what perspectives and narratives are absent from the available sources; and c) interpreting the historical context, intended audience, purpose, or author’s point of view of these sources.

21. Integrate evidence from multiple historical sources and interpretations into a reasoned argument and/or compelling narrative about the past.

22. Use historical methods and sources, inclusive of ethnic and Indigenous studies methods and sources, to understand and reflect upon the roots of contemporary social systems and environmental systems of oppressions and apply lessons from the past to eliminate injustice and work toward an equitable future.
23. Develop an understanding of the ways power and language construct the social identities of race, geography, ethnicity, gender etc. Apply these understandings to one’s own social identities other groups living in Minnesota, especially those whose stories and histories have been marginalized, erased or ignored.

24. Describe how individuals and communities have fought for freedom and liberation against systemic and coordinated exercises of power locally and globally; identify strategies or times that have resulted in lasting change; and organize with others to engage in activities that could further the human rights and dignity of all.
