

Chapter 3 – Program Dimension

The program dimension designates the programmatic use for which financial activity is taking place. In Minnesota, the program dimension encompasses all aspects of school district operations, including instructional, administrative and various support activities.

The program dimension codes are separated into a series of 10 categories. Further definition of each category is found at the beginning of each listing. The 10 categories of the program series are:

Administration	010-099
District Support Services	100-199
Elementary and Secondary Regular Instruction	200-299
Vocational Education Instruction	300-399
Special Education Instruction	400-499
Community Education and Services	500-599
Instructional Support Services	600-699
Pupil Support Services	700-799
Sites and Buildings	800-899
Fiscal and Other Fixed-Cost Programs	900-999

Several aspects of accounting procedures should be noted:

1. All expenditures must have a program code; however, revenues often do not relate to a specific program and are therefore coded to Program Code 000, Districtwide. (The finance dimension is usually used to tie together revenues and their allowed expenditures. Districts may choose to use a program code to further identify various categorical revenues.)
2. Codes in this manual represent the minimum set of codes which are necessary for state reporting. For management purposes, districts may also construct and use many other program codes and crosswalk them to the set of state reporting codes.
3. The program dimension has historically not been used to identify expenditures for pupil transportation cost reporting. Instead, the finance dimension has been used to report the components of transportation expenditures.
4. Expenditures made for capital items may use any appropriate program code; however, expenditures from the Operating Capital Restricted/Reserved (Fund Balance Account 424) must also use Finance Code 302, Operating Capital.
5. Occasionally an expenditure will have several possible program dimension codes; for example, legal expenses (110) for special education (400 series). In these circumstances, the rule is to always use the non-instructional code (000 through 199) if it applies. Thus, in this example, use Program Dimension Code 110, Business Support Services. Another example would be for a director of vocational education whose primary tasks are administrative. Use Program Dimension Code 030, Instructional Administration rather than Program Dimension Codes 300 to 399, Vocational Instruction.
6. All employee benefits at year-end are to be allocated to the program that generated the benefit. Program Code 930 is a “clearing account” that may be used during the year for employee benefit expenditures before the end-of-year allocation to appropriate programs.

Code Title and Definition**000 Districtwide Revenue**

Program Code 000 is not a valid code for expenditure accounts. Code 000 may be used as a revenue program code when it is desired to not associate the revenue with a specific program. (It may be used as a "filler" for filling out the 17-digit code when program is not relevant for coding a revenue.)

Administration (010 to 099)

These programs include all costs for general administration, instructional administration and school site administration for the school district. Administrative services are defined as those provided by head administrators who are in charge of instructional or instruction-related units. This includes the school board, superintendent, principals, assistant superintendents, and directors of instructional areas. Included are the costs of their immediate offices, including those individuals in direct support of the administrator. This series does not include administrators of non-instructional activities such as the business manager, food service manager, or director of buildings and grounds. Include these individuals in their respective programs.

Code Title and Definition**010 Board of Education**

Activities related to the board of education, its members, and professional and support staff reporting directly to the board. Includes travel, conventions and memberships in school board organizations, and other expenses related to the board's official duties. Also use this code for boards of Regional Management Information Center (RMIC), service cooperatives, education districts, charter schools, and joint powers entities.

020 Office of the Superintendent

Activities performed by the superintendent and immediate staff in the general management of affairs of the chief executive officer.

030 Instructional Administration

Activities of administrators, and their offices, responsible for a group of schools or an instructional area. For example: director of elementary education, assistant superintendent for secondary, area directors, and directors of career and technical education. Also include federal program administrators. Do not include administrators of offices which deal with the non-instructional aspects of operations, or for which another program series exists; include these individuals with their respective programs.

050 School Administration

Activities relating to the administration of local schools, including the cost of one licensed principal, or a prorated amount if the principal is shared between sites and his/her immediate office. Do not include personnel for whom a separate series is provided. Also do not include assistant principals (see Program Code 605). Include expenditures for administrative site councils.

However, if a business course in business communications is taught where the emphasis is on business communication skills, the course is properly recorded in Program Code 215 – Business.
