

## Officially Recognized Charter School Early Learning Programs

This document provides a listing of charter schools with officially recognized early learning programs approved by the Minnesota Department of Education. Approval does not indicate a charter school’s early learning program is operational. A list of operational early childhood health and developmental screening programs can be generated from the [Early Learning Services Program Search webpage](#) by selecting “Early Childhood Screening” as the “Program type.” For an instructional preschool or prekindergarten program, please [contact the charter school](#) directly to determine if the program is operational.
