We empower you with reliable data.

Introducing SLEDS

The Minnesota Statewide Longitudinal Education Data System (SLEDS) matches student data from pre-kindergarten through completion of postsecondary education and into the workforce to provide you with accurate, relevant data to identify the most viable educational and career pathways to achieving successful outcomes.

LET’S TALK MCCC

The Minnesota Common Course Catalogue in SLEDS

If your school district submitted course enrollment data to the MCCC, you can view academic course-taking patterns of high school graduates for courses that have a graduation requirement in Minnesota, and compare them to other districts and the statewide data. Participation is set to be viewed by various student groups, so that users can dig into their data to identify gaps and patterns.

Your MCCC data has been uploaded to SLEDS.

EXPLORE NOW

CREATE REPORTS

- College and Career Readiness Goal (World’s Best Workforce): What percentage of high school graduates met or exceeded state requirements in academic areas? Are there any gaps identified between student groups?

USE FILTERS

- By school, district, region, race/ethnicity, and various student groups.

Do you know about SLEDS?

SLEDS is managed jointly by the Minnesota Office of Higher Education (OHE), Minnesota Departments of Education (MDE) and Employment and Economic Development (DEED).

By bridging your school district data with other incoming data, SLEDS offers you a comprehensive perspective on the effectiveness of education programs so you can design targeted improvement strategies to help students.
Are there inequalities in gender participation?

Science

As shown in the sample below, you can view the output of your school’s student body that took the required science courses for graduation, and whether they met or exceeded the requirements, by selecting the graduation year.

Please keep in mind that a student must have been reported for four years of high school to be included on these reports.

Entire science output for a single high school
Graduation year: 2016

Electives to ACT Scores

If your school submitted the enrollment data for elective courses to the MCCC, this report will provide you with non-academic course-taking patterns and ACT scores (composite and sub-scores) for your school’s graduating students, allowing you to create multiple views for comparison against other school and statewide results.

Please keep in mind that the elective course credits threshold is 2.
