

Racially identifiable school means a school where the percent of protected students in a school is more that 20 percentage points above the percent of protected students in the entire district for the grade levels served by that school. This is based on Minn. Rule 3535.0110 subp. 6.

Minn. Rule 3535.0110 defines protected students as African/Black Americans, Asian/Pacific Americans, Chicano/Latino Americans, American Indian/Alaskan Natives, and multi-racial.

A school's percentage of protected students is calculated by dividing the school's enrolled protected students by the school's total enrollment. A district's percentage of protected students is calculated by dividing the district's enrolled protected students by the district's total enrollment. District enrollment includes students enrolled in all public schools within the district in the same grades served by the school.
