

How to use Minnesota’s Early Childhood Longitudinal Data System (ECLDS) to locate COVID-19 emergency childcare sites by school district.

- 1 Go to Minnesota’s Early Childhood Longitudinal Data System’s Comprehensive Services Map (<https://education.mn.gov/Maps/CompSvcs/>).
- 2 Under COVID-19 Emergency Child Care, select “COVID-19 Emergency Child Care” (note this list is updated weekly). Select a school district from the dropdown menu.

COVID-19 Emergency Child Care - Becker District Table

ECLDS’s comprehensive services map is a geolocation tool for making quick connections to resources in local communities. It can also be used to advocate for needed services not yet in your area.

The map allows you to locate nearby support programs and resources that can be useful to the families and individuals you interact with, such as low-cost health providers, early care, schools, local agencies and programs, and organizations, classes, and libraries.

Additionally, you may find this tool useful for gathering information to complete your own local reporting and community assessment.
